Freestyle project
Classic, general-purpose job type that checks out from up to on
executes build steps serially, followed by post-build steps like a
artifacts and sending email notifications.

Pipeline
Orchestrates long-running activities that can span multiple build
Suitable for building pipelines (formerly known as workflows) an
organizing complex activities that do not easily fit in free-style j

Multi-configuration project
Suitable for projects that need a large number of different confi
such as testing on multiple environments, platform-specific buil

Folder
Creates a container that stores nested items in it. Useful for gro
